Dear Mr. Winterholer:

NUS Corporation is under contract to the U.S. Environmental Protection Agency (EPA) as a technical and management services contractor in support of the EPA's hazardous waste site assessment activities. In this support activity, the NUS Field Investigation Team (NUS/FIT) has been assigned the task of conducting a Screening Site Inspection of Quinn K J and Co. Inc. located at 135 Folly Mill Road in Seabrook, New Hampshire.

As we discussed during our March 18, 1991 telephone conversation, NUS/FIT has scheduled a site visit for this property on April 18, 1991, weather permitting. During this visit we will primarily be examining the property layout, observing current site conditions and taking photographs. We will not enter buildings, nor will we collect environmental samples.

Your cooperation is requested in giving EPA and their representatives access to complete this activity. In order for us to plan successfully, we would appreciate your signing the enclosed EPA access agreement and returning it within two weeks in the envelope provided. A copy is provided for your records.

If you would like a copy of the final report a written request should be made to the EPA State Coordinator:

Don Smith
Superfund Support Section (HSS-7)
US EPA Waste Management Division
JFK Federal Building
Boston, MA 02203-2211

At this time the report is scheduled for completion in October 1991.
